Vincent du Plessis's Cover Letter:

Dear Hiring Team,

In 2019, I taught myself web development from a pile of YouTube tutorials, and seven years later I'm still building and still learning. If you're looking for someone who learns fast, owns their work and enjoys solving problems, I'd love to be on your team.

I work in JavaScript, HTML, CSS, Python, PHP, Node.js and React, and I run Linux and love open source. I like clean, efficient code and straight talk, and I'd rather ship something and own it than sit through a meeting about it. I've also worked as a supervisor, a metrologist and a delivery driver, so I know how to show up, adapt and get things done under pressure.

You can see my work, my story and my blog at **vincentduplessis.co.za**, and my code is on GitHub at github.com/vincent-du-plessis. I'm remote-ready, always curious, and happy to bring the energy (and a decent chess game).

Thank you for your time. I'd love the chance to chat.

Yours sincerely,
Vincent du Plessis
